The Honorable Louie Gohmert  
U.S. House of Representatives  
2269 Rayburn HOB  
Washington, DC 20515

Dear Congressman Gohmert,

On behalf of the Alliance for Natural Health USA, and the one million U.S. consumers and healthcare practitioners we represent, thank you for your leadership in introducing H.R. 5816, the National Informed Consent Exemption (NICE) Act.

ANH is a nonprofit organization that protects the right of natural health practitioners to practice, and the right of consumers to choose the healthcare options and treatment modalities they prefer, including being able to choose the medical procedures they receive.

Patients have a right to make their own decisions about treatments based on informed consent. The onslaught of government-imposed mandates forcing Americans to take the COVID-19 vaccine is a severe government overreach on our personal freedoms and into the doctor-patient relationship. A certain percentage of the population should not be vaccinated due to a medical/genetic/environmental pre-disposition to adverse reactions. Given this risk, the decision to vaccinate must remain in the hands of families and their medical professionals - NOT the government. Government bureaucrats who do not see patients do not have the right to insert themselves into decisions that should be left to doctors and their patients.

We are grateful for your bravery in sponsoring the NICE Act to remove federal funding for any vaccine requirement that will restrict or eliminate the right of Americans to make this healthcare decision for themselves or their family. ANH endorses this bill and encourages Congress to swiftly pass the NICE Act.

Sincerely,

A handwritten signature in blue ink that reads "Mitchell Quisenberry".
